B. Registration – Fuko

C. Personal Schedule – Naoyuki

Table Design / Controller API

1. Member / Location – Takuma
2. Schedule – Shohei
3. Message/Memo – Fumiaki

Logics

(1)Locator – Kazunori

(2)Schedule – Sarah

(3)Authentication – Masahiro

Rspec Introduction

Now we will share the same source code from Masahiro's Labil repository.

Check the Rspec current condition.

Now let us share the project

1st: fork the hatuka-k/labil project to our own account.

2nd: Change

check the remote origin to our own 'labil'.

```
git remote set-url origin https://  
ikuokobayashi@github.com/webdbhosei/  
labil
```

Now we have our branches. Then, next is to
'pull request.'
